Overview

Exploration

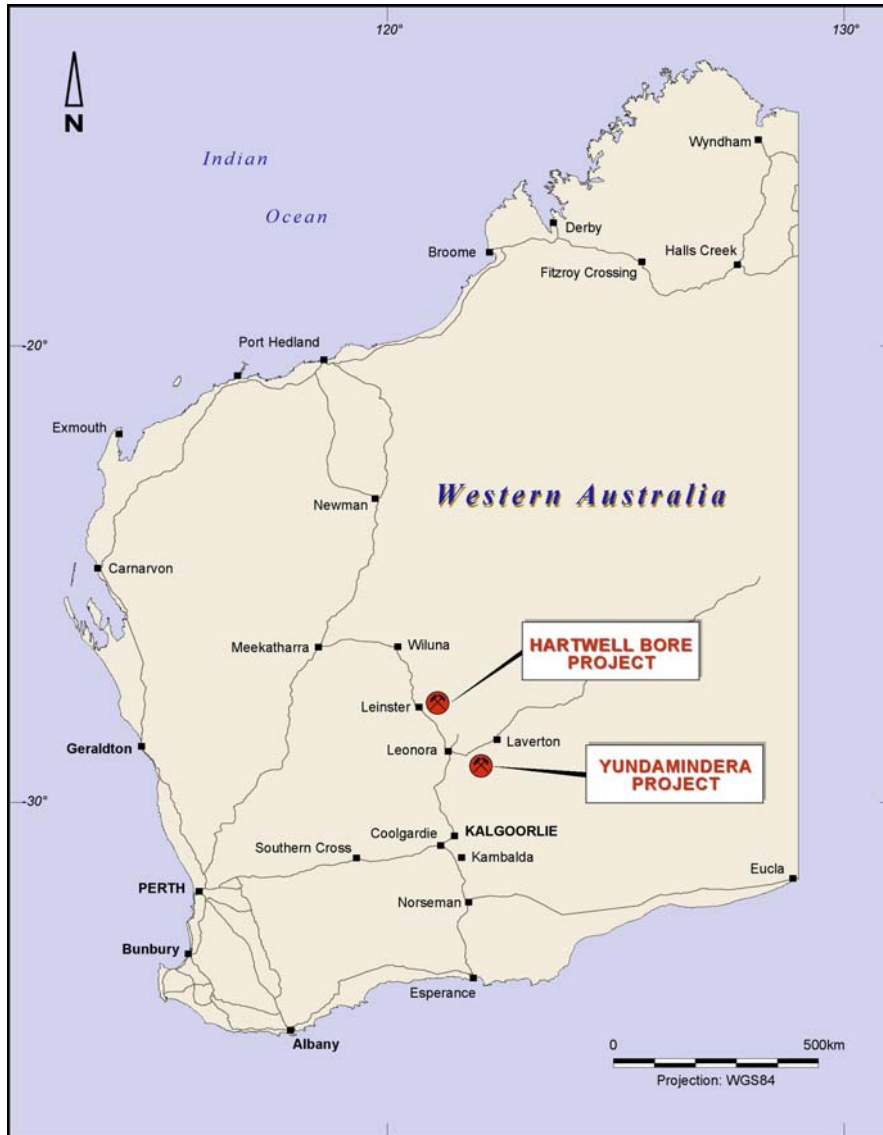

Figure 1 Project Locations

Yundamindera Project

(Atticus earning 80%)

The Yundamindera gold project is located in the Eastern Goldfields Province of the Yilgarn Craton, 685 kilometres northeast of Perth and 205 kilometres north-northeast of Kalgoorlie. The project comprises one granted exploration licence and two granted prospecting licences, which are located adjacent to the historic mining centre of Yundamindera. Gold exploration carried out by a number of previous operators and Atticus has identified several areas of coherent gold anomalism

(>50ppb Au & >100ppb Au) in near-surface soil sampling and RAB/aircore drilling that require follow-up work.

Planned Auger Soil Sampling

Auger soil sampling has been planned to infill gold-in-auger soil anomalies (>20ppb Au, peak value of 126ppb Au), previously generated by Atticus Resources Ltd within E39/1110. The relevant

statutory approvals are awaited and it is anticipated that the programme will be completed during the September Quarter.

Hartwell Bore Project
(Atticus 100%)

The Hartwell Bore gold project is located in the northern parts of the Eastern Goldfields Province of the Yilgarn Craton, 575 kilometres northeast of Perth and 32 kilometres east-northeast of Leinster. The single tenement, E36/653, covers an Archaean greenstone sequence at the western margin of the southern Yandal greenstone belt.

Planned Auger Soil Sampling

Auger soil geochemistry has been planned to provide better definition of the existing gold prospects at Hartwell Bore. The Hartwell Bore South prospect is considered to have the best remaining potential and will be the focus of the sampling programme, which is awaiting the relevant statutory approvals. This programme should also be completed during the September Quarter.
